

Photonic Cleaning Technologies'

First Contact™

Polymer Cleaning Solution

is **Exempt** under AQMD Rules!

Some Customers in southern California are in the South Coast Air Quality Management District (AQMD). This area must cope with restrictive Rules limiting the amount of Volatile Organic Compounds (VOC) and fine particulates released to the atmosphere. The AQMD Rules may be found at www.aqmd.gov.

First Contact™ Polymer Cleaning Solution is classified as a non-pigmented coating. It is not a solvent cleaner.

Rule 1145 governs Coatings. The Rule specifically exempts 'clear or translucent coatings..'

If your company uses solvents to prepare or clean work-in-process, **First Contact™** is a viable alternative to help comply with AQMD regulations.

First Contact™ Deluxe Kit

First Contact™ is Available Exclusively From:
